

This infographic contains **key figures** from the *2021 Joint Report on Multilateral Development Banks' Climate Finance*. For purposes of greater transparency and consistency, 2021 figures report climate finance in all economies where the MDBs operate, with a breakdown by income level.

The report and infographic were prepared by the European Investment Bank, together with the African Development Bank, the Asian Development Bank, the Asian Infrastructure Investment Bank, the Council of Europe Development Bank, the European Bank for Reconstruction and Development, the Inter-American Development Bank Group, the Islamic Development Bank, the New Development Bank and the World Bank Group.

The CEB and the NDB aim to report on the details of their climate finance (e.g., by region, sector and instrument) in future editions of the Joint Report, as they extend the application of the joint MDB methodologies. In the meantime, this year's report only presents some aggregate data.

In 2021, NDB committed a total of US\$ 509 million in climate finance, all of which was dedicated to climate mitigation activities in middle-income countries (26 percent of NDB's total approvals excluding its COVID-19 emergency program loans).

The CEB, with a commitment of US\$ 621 million in climate finance, is in the process of fully implementing the joint MDB methodology for climate finance tracking in its operations. In this report, the CEB's 2021 figures are based on the MDB methodology but may be incomplete and therefore should be considered as conservative.
